

Abhi Deshmukh

I have extensive experience in product engineering, transformational leadership and engineering management. I have delivered delightful client outcomes by creating B2B SaaS and On-Premise products. I have worked in start-ups and large companies managing geo distributed teams. I have led and managed Lab/Site Operations for 500+ employees, managed Dev, QA, DevOps, Implementation, Client Support and Product teams. I have experience in building teams, hiring, performance management and budget management. I have 5 US Patents in the Cloud, AI domain.

I have product development & engineering management expertise across multiple domains: SaaS (B2B) Application, Machine Learning, Artificial Intelligence, Workflow Automation, IT Infrastructure Monitoring & Management Automation, Portals, OSS/BSS, Network/IT Expense Management, Network Protocol Development, Real-time OS and Embedded Systems.

I have experience working with diverse technology stacks Java Enterprise (J2EE), Spring, Microsoft .NET, Python, Relational and NoSQL databases, Web Services (REST, SOAP), ETL, Business Intelligence, Elastic (ELK), Azure & IBM Cloud Platforms, Open Source software like Apache Tomcat, Kafka, Spark, Hadoop, and UI frameworks like JQuery, Angular and React.
