

Short Bio of
Anand Anandkumar PhD,
Co-founder, CEO of Bugworks

Dr. Anandkumar is a Co-founder and CEO of Bugworks, an Indo-USA-Australia biotech startup, working on tackling the massive problem posed by *untreatable bacterial Superbugs* which are implicated in hospital/community infections and bio-terrorism situations. Bugworks hopes to make a massive impact on humanity by addressing large unmet medical needs while making its products affordable and accessible to all. The company is supported by bluechip investors and governments from across the globe.

Prior to Bugworks, Anand was the co-founder of Cellworks a company that pioneered the use of computer simulation to support personalized cancer therapies. Prior to the biotechnology experience, Anand was a veteran of the semiconductor industry having worked in the USA, EU, Japan, China, before returning to India.

Bachelors degree Honors in Electronics and Communications from Anna University, Chennai and a Masters/PhD in Biomedical Engineering from the George Washington University, Washington DC.
