

Mahek Mody is the co-founder of [upliance.ai](https://upliance.ai), a pioneering startup transforming home cooking through AI-powered smart kitchen technology. An IIT Bombay graduate and founding member of Formula Bharat, Mahek's journey reflects his deep passion for innovation and engineering excellence. Prior to [upliance.ai](https://upliance.ai), he was an early employee at Ather Energy, where he gained invaluable experience developing transformational and modern products specifically tailored for the Indian market. With expertise in rapid product development, generative AI, and innovative hardware solutions, Mahek seamlessly integrates the agility of software development with the intricacies of hardware design. His strategic vision emphasizes leveraging technology to redefine consumer interactions, making cooking accessible, interactive, and intuitive. Passionate about fostering innovation in the AI and robotics space, Mahek frequently engages with industry leaders to discuss emerging trends and the future of hardware product development. He is dedicated to creating products that not only enhance daily life but also empower users through intelligent, human-centric design
